Professional Summary

Backend Developer specializing in Python, FastAPI, PostgreSQL, REST APIs, and AI-powered backend systems. Experienced in building scalable services, automating workflows, and integrating LLM-based applications.

Education

Navrachana University, Vadodara, BTech in Computer Software Engineering — Aug 2021 – May 2025

GPA: 9.23/10.00

Internships & Freelance

Intern, Linde Engineering India Pvt. Ltd. – Vadodara, IN — Jan 2025 – May 2025

- Automated extraction of 15+ data fields from unstructured PDFs using Python (Tabula, pandas), reducing manual data entry time by 90%. Consolidated multi-year shipment records into a structured dataset, improving audit and reporting efficiency across departments.

AI Backend Engineer Intern, VerifyLens, PMAccelerator — Remote — Sept 2025 – Dec 2025

- Built the FastAPI backend for VerifyLens, designing and creating the PostgreSQL database schema and implementing secure JWT authentication, document-upload flows, and claim-extraction logic. Developed modular REST APIs, created pipelines for audio transcription, claim generation, and fact-verification.

Professional Experience

Software Engineer, Newscape Consulting – Pune, Maharashtra — Feb 2026 – Present

- Designed and developed scalable healthcare data integration pipelines using Databricks, PySpark, Delta Lake, Kafka, and MongoDB, building reusable ETL frameworks for Client, Worker, Visit, Authorization, Coverage, Payor, Episode of Care, and Care Team with schema validation, Delta MERGE, Change Data Feed (CDF), and event-driven processing.
- Developed production-grade Kafka publishing and MongoDB persistence services using Avro, Schema Registry, and OpenTelemetry, while creating reusable Spark utilities for data validation, JSON normalization, offset management, incremental processing, and performance optimization across multiple pipelines.

Projects

Job Assistant Agent – Backend — github.com/Job-Assistant

- Python, FastAPI, Supabase (PostgreSQL), Google Gemini AI, REST APIs
- Built a FastAPI-based backend using Python and Supabase to fetch, store, and manage remote job listings, user profiles, and resume data through scalable REST APIs. Integrated Google Gemini AI for resume–job matching, candidate scoring, and interview QA generation, including PDF resume parsing and AI-driven analysis workflows.

TDNVM Community Website - Backend(FreeLance) — github.com/TDNVM-server

- Python, FastAPI, Supabase/MySQL, JavaScript
- Developed the FastAPI backend for a community website, integrating Supabase/MySQL for data storage and building JS modules for improved interaction and search. Designed REST APIs, implemented authentication, and ensured a scalable, high-performance service.

Technologies

Languages: Python, SQL, Java, C++

Backend: FastAPI, Flask, REST APIS

Databases: PostgreSQL, MySQL, Firebase, SQLite

Libraries: OpenCV, Pandas, Scikit-learn, Seaborn

Cloud and Tools: Supabase, Git, Render, VS Code, Databricks, Kafka, MongoDB
